(54) Title: CLEAN LABEL STABILISED STARCH WITH IMPROVED ORGANOLEPTIC PROPERTIES

(57) Abstract: The current invention relates to a process for preparing stabilised starches. The process comprises a treatment with a reagent which is converting organoleptic impurities and/or precursors of organoleptic impurities into hydrolysed and/or oxidatively degraded organoleptic impurities and/or precursors of organoleptic impurities, followed by a bleaching step. The product has improved viscosity stability and/or improved setting properties and is applied in food, feed, pharma and cosmetic products.
